

Lavs Hot Radiators

Price list

Package	Price	Included
1. Radiator Valve Call-Out	£69	A small service visit for a straightforward radiator issue such as replacing a valve, vent or minor connection component. Suitable where the existing radiator and nearby pipework remain in place. • One radiator service visit • Valve, vent or minor connection work • Basic leak and operation checks • Work area left tidy
2. Single Radiator Swap	£265	Replacement of one existing radiator in the same general position, using the current heating connection points where practical. The package is suited to a worn, damaged or unsuitable radiator. • Remove one existing radiator • Fit one replacement radiator • Reconnect existing pipework • Fill, vent and check operation
3. Two-Room Radiator Upgrade	£1,425	A coordinated upgrade for two rooms, including radiator replacement or new radiator installation and associated valve changes. We review the connection routes before carrying out the work. • Radiator work in two rooms • New or replacement radiator units • Thermostatic or standard valve fitting • Heating and connection checks
4. Three-Room Heating Refresh	£2,109	A multi-room installation for improving radiator coverage across three rooms in a home or small property. The work includes agreed radiator positions and the pipework alterations needed for the selected layout. • Three-room radiator installation • Radiator and valve supply allowance • Local pipework alterations • System refill, venting and testing
5. Whole-Home Radiator Fit	£3,389	A complete radiator installation for a typical home, covering multiple bedrooms and living areas. We coordinate radiator locations, valves and connection work across the property rather than treating each room as a separate job. • Radiators throughout a typical home • Room-by-room installation planning • New valves and connecting pipework • Final heating operation checks

Package	Price	Included
6. Home Heating Repipe	£4,525	A larger domestic project combining a broad radiator replacement with planned pipework renewal or rerouting. This is suitable where the existing heating connections need substantial improvement across several rooms. • Multiple radiator replacements • Planned heating pipework rerouting • Radiator valve and connection upgrades • Staged testing across the property
7. Large House Heating Installation	£6,909	A substantial installation for a large home, renovation or multi-level property requiring many radiators and coordinated heating pipework. The scope is planned around floor layout, access and the required heating zones. • Multi-level radiator installation • Extensive new or replacement pipework • Heating zones and controls review • Commissioning checks across all rooms
8. Apartment Block Heating Fit	£9,640	A planned heating installation for a small apartment block or similar residential development. Work can cover shared planning and repeated apartment layouts, with installation coordinated around access and occupancy. • Radiator installation across several units • Shared and apartment-level pipework planning • Standardised valve and radiator schedules • Section-by-section testing and handover
9. Commercial Building Heating System	£14,129	A large-scale radiator and heating installation for a commercial building, school-style premises, managed property or whole-building refurbishment. The project includes coordinated room coverage, extensive distribution pipework and a structured handover. • Whole-building radiator installation • Commercial heating distribution pipework • Multiple areas or floor coordination • Testing records and practical handover
